Submitted on 26 May 2020

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

INCLUDING OPEN SCIENCE TO RESEARCH PROJECTS SINCE THEIR SUBMISSION: A LIBRARY PERSPECTIVE

Romain Féret¹ and Marie Cros¹

WHAT WE SEE

Funders such as H2020 or the French Agency for Research require that funded projects disseminate publications in open access and write a data management plan.

Since the project's open science strategy is not assessed at the submission stage, few project coordinators consider these aspects that early.

WHY IT IS A PROBLEM

This lack of anticipation may lead to poor open science practices and can create difficulties in the project management, such as:

- Sharing of responsibilities for open science obligations are unclear
- Open science costs are not budgeted
- Partners do not agree on the level of data sharing

WHAT WE PROPOSE

Our Library has implemented a service dedicated to research projects in order to:

- Ensure open science is included in submitted projects as goals, deliverables, resources...
- Support research projects in implementing their OS commitments
- Help them report on their open science activities during and at the end of their project
