HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

OPEN

Author Correction: Experimental protection of quantum coherence by using a phase-tunable image drive

S. Bertaina, H. Vezin, H. De Raedt & I. Chiorescu

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-020-77047-5>, published online 10 December 2020

The original version of this Article contained an error.

In the Results and discussion section, under the subheading ‘Qubit dynamics’,

“The general condition is $F_R = n\Delta$, $n \in N$ showing a comensurate motion of the qubit and h_i on the Bloch sphere.”

now reads:

“The general condition is $F_R = n\Delta$, $n = 2k$, $k \in N$ showing a comensurate motion of the qubit and h_i on the Bloch sphere.”

Furthermore, in the Supplementary Information file, in the Coherent pulses in rotating frame: Linear Rabi drive and circularly polarized Qubit protection section, under the subheading ‘Shirley–Floquet formalism’, Equations S18–S21 and surrounding text contained errors. The original Supplementary Information file is provided below.

The original Article and accompanying Supplementary Information file have been corrected.
